SUMMARY

- Kasyiful Kurobi Alqorrosyai', Informatics student (Class of 2022)
- Specializing in Web Development and Mobile Development
- Passionate about learning the latest web

EDUCATION

Universitas Islam Indonesia	2022 - Present
Bachelor of Science in Informatics, 3.71/4.00	
Coding Camp 2025 powered by DBS Foundation	Feb 2025 - Jul 2025
Front-End and Backend Web Development	
AWS Backend Academy	Jun 2025 - Jul 2025
Backend Developer with generative AI	

EXPERIENCE

Fullstack Developer	Oct 2025 - Nov 2025
PT Xetup Teknologi Indonesia - Remote	Bantul, DI Yogyakarta
• Contributed to full-stack web development projects using modern technologies and scalable architecture. • Collaborated with cross-functional teams to design, develop, and deploy responsive, high-performance web applications. • Implemented RESTful APIs, authentication flows, and database schema designs using Node.js (Express) and MySQL. • Focused on code maintainability, performance optimization, and seamless frontend-backend integration.	
Frontend Developer Intern	Apr 2025 - May 2025
PT Kawan Kerja Indonesia - Magang (Remote)	Bandung, Jawa Barat
• Contributed to the development of responsive and user-friendly web interfaces using HTML5, CSS3, and JavaScript. • Implemented interactive components and layouts with Tailwind CSS, enhancing the overall user experience. • Participated in code reviews, debugging sessions, and maintained clean code practices using Git for version control.	
Laboratory Assistant – Information System & Software Engineering Laboratory (SIRKEL), Universitas Islam Indonesia	September 2024 - Present
Mobile Application Development Assistant	Sep 2025 - Present
• Assisting students in understanding mobile application development concepts and implementation using Kotlin and Jetpack Compose. • Guiding practical sessions focused on Firebase integration, MySQL data management, and XML-based UI design. • Supporting curriculum enhancement through modern Android development practices and real-world project simulation. • Collaborating with lecturers to evaluate student progress and provide technical feedback.	

Information System Development Assistant

- Focused on Management Information System (MIS) development, covering web-based system architecture.
- Assisted students in designing and implementing scalable MIS applications.
- Provided guidance on database design, system analysis, and web-based application workflows.
- Ensured students understood security best practices and data integrity in system development.

Feb 2025 - Aug 2025
Universitas Islam Indonesia

Web-Based Application Development Assistant

- Assisted students in Front-End Web Development, focusing on Vue.js, JavaScript, and UI/UX best practices.
- Developed learning materials and coding exercises to enhance student understanding.
- Provided hands-on guidance in implementing modern front-end workflows and best coding practices.
- Mentored students in optimizing UI performance and integrating front-end with APIs.

Sep 2024 - Jan 2025
Universitas Islam Indonesia

PROJECT

Elequenaa Homestay

Oct 2025 - Nov 2025
Next js, MySQL, and Tailwind

- Developed a homestay booking website with complete accommodation details and real-time booking system.
- Designed an intuitive and responsive UI for both guests and administrators using Next.js and Tailwind CSS.
- Integrated MySQL database for managing reservations, room availability, and guest data.
- Focused on clean code architecture and seamless user flow from homepage to booking confirmation.

Desa Lembana Website

Sep 2025 - Oct 2025
Express js, React, Tailwind, MySQL, and VPS

- Developed a modern tourism website for Desa Lembana featuring destinations, events, and photo galleries that highlight the local culture.
- Built both frontend and backend using a modular architecture to ensure scalability and maintainability.
- Implemented a responsive interface with Tailwind CSS and dynamic content rendering for event and destination management.
- Utilized React for an interactive user experience and Express for RESTful API integration, fully deployed on a live hosting environment.

Engineering Test Web Application

May 2025 - Present
JavaScript, Laravel, Tailwind, VueJS

- Developed a web-based application to conduct online engineering aptitude tests.
- Implemented interactive testing features with countdown timer, auto-submit, and instant scoring.
- Built an admin dashboard for managing users, questions, categories, and test results.
- Designed a modern user interface using Tailwind CSS and DaisyUI.
- Project is currently under development and not yet finalized.

Fitness Class Prediction App

- Built a fitness class recommendation system using Express.js and Supabase.
- Integrated a machine learning model to predict optimal workout classes based on user input (e.g., fitness level, goals, preferences).
- Developed REST API to handle user input and deliver predictions from the ML model.
- Implemented authentication and data storage using Supabase.
- Enabled data-driven, personalized gym planning for users.

May 2025
Express.js, Supabase, Machine Learning

Gili Ketapang Website desagiliketapang.com

- Developed a comprehensive village website for Gili Ketapang featuring village history, news, and tourist destinations.
- Built both the public-facing site and admin dashboard, ensuring mobile responsiveness and clean UI/UX design.
- Utilized Laravel for backend structure and data management, with PHP for custom logic and routing.
- Designed the interface using Tailwind CSS, Alpine.js for interactivity, and Quill.js for rich text editing in admin panels.
- Integrated dynamic content rendering and CRUD functionality for admin-managed news and tourism sections.

Apr 2025 - May 2025
JavaScript, Alpine JS, Quill JS, Laravel, and Tailwind CLI

Sebarr.in

- Designed and developed a responsive digital wedding invitation website using Tailwind CSS and JavaScript.
- Implemented smooth scrolling, countdown timer, gallery, RSVP form, and custom animations for a better user experience.
- Focused on mobile-first design to ensure seamless display on various screen sizes and devices

Apr 2025 - May 2026
JavaScript, and Tailwind CLI

Power Quest - Muscle Training Android App

- Developed a mobile fitness application with animated workout guides targeting various muscle groups (back, abdomen, chest, legs, and arms).
- Used Lottie Animation and custom pixel art to provide clear and engaging visual instructions.
- Implemented a gamified system where users earn EXP after each workout to level up and unlock new characters.
- Utilized Firebase for authentication and data storage, ensuring a smooth and scalable user experience.
- Designed intuitive UI layouts using XML, optimized for different Android screen sizes.

Aug 2025 - Feb 2026
Kotlin, XML, Firebase, Lottie Animation, Pixel Draw

Tajaherang Web

- Description: Developed a financial management web application for Tajaherang tourism using. The system ensures well-structured financial records similar to accounting reports.
- Role: Front-End Developer

Aug 2025 - Feb 2026
JavaScript, Vue, Vuetfy, Vite

PathHealth: Mental Health Information System Development

- Description: Built a web-based information system including interactive data visualization with Chart and Map. and Recommendation mentalhealth test from LLM
- Role: Full-Stack Developer

May 2024 - Jun 2024
JavaScript, PHP, Bootstrap, ChartJS, LeafletJS

Zero Waste Web Development Project

- Description: Developed a Zero Waste-themed web application in the Yogyakarta region.
- Role: Front-End Developer & Hipster

Jan 2024
HTML, CSS, JavaScript, Golang

Djogja Nusantara: E-Tourism Web

- Description: Developed a web application E-Tourism in DI Yogyakarta.
- Role: Full-Stack Developer

Sep 2023 - Oct 2023
JavaScript, PHP, Bootstrap

TECHNICAL SKILLS

- Programming Languages: PHP (Native & Laravel), JavaScript,HTML5, and CSS
- Frameworks: Vue, Vuetify, Bootstrap, Tailwind
- Libraries: Chart.js, jQuery, DOM, Leaflet
- Databases & Tools: MySQL, SQLite, XAMPP, Laragon, TablePlus, Visual Studio Code
- Version Control: Git & GitHub

CERTIFICATIONS

- Hackfest 2024 – Hipster Role
